

FARM SCOPE

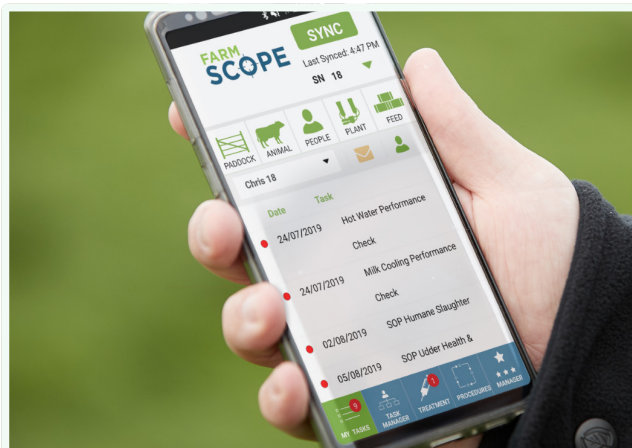

The way a business captures and manages quality assurance data can result in reduced productivity, inefficiencies and poor communication within teams.

QCONZ have helped clients to overcome this issue by developing electronic data solutions to help better manage this process and improve business intelligence through reporting.

Task management and quality assurance app

FarmScope signals the end of paper-based quality assurance records. Designed for farmers, audit bodies and QA programme managers, FarmScope allows you to manage your land, feed, animals and staff and record and report farm performance from your smartphone.

FarmScope is a simple, low cost, fully electronic, on/offline solution that can put you in control of all those important jobs across a farm.

What does FarmScope do?

- Connects farmers, auditors and QA programme managers
- Scheduled programme checks and record keeping at the touch of a button
- Generates automated reports and reminders

How it works

- Dairy companies or farm managers create tasks or on-farm procedures on web dashboard
- Tasks, procedures and programme checks are assigned/scheduled to farm staff to complete
- Staff install mobile app and record, capture and update tasks assigned using smartphone
- Staff receive task alerts and reminder via email or text

Benefits

- One-stop-shop for all compliance needs
- Ready access to all procedures, records and checklists
- Real-time data entry and information sharing
- Ease of task management and monitoring
- Cost effective, paperless systems
- User friendly from your desktop to your smartphone
- Customise and brand to suit your programme requirements

Features

- Simple tasks requiring done/not done responses
- Comprehensive or compulsory tasks requiring adherence to farm SOPs
- Automated reports and reminders
- Timely data exports for trend analysis
- Fully electronic on/offline
- Cloud based web system
- Fully supported
