

# QCONZ FreshWater Farm Plan

Build your own plan to  
meet regulatory  
requirements and manage  
environmental risk

## FWFP system for farmers and growers

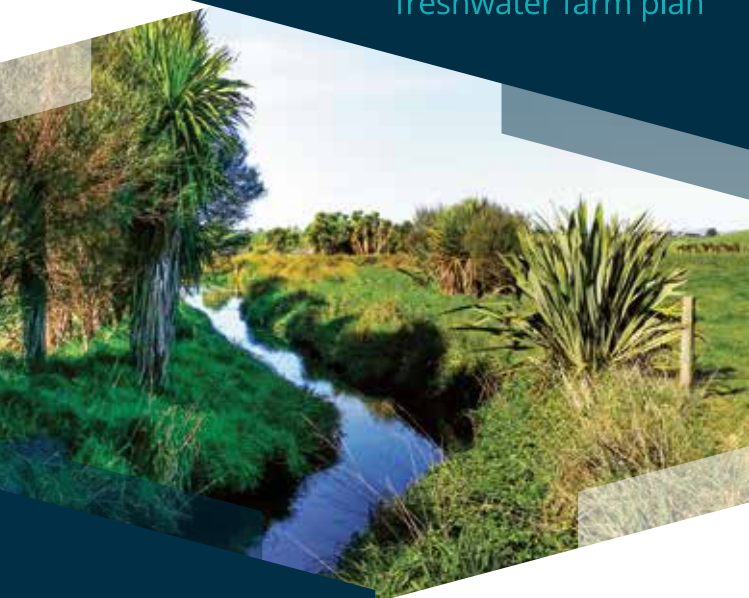

The QCONZ FWFP system allows you to build your own digital freshwater farm plan. It's affordable, intuitive and includes a wizard feature that steps you through the process.

Based on the same successful technology being used by farmers who supply Tatua Co-op, Dairy Goat Co-op and Open Country Dairy.

# Benefits and Features

- Affordable electronic solution
- Build your own with the easy to use wizard feature
- Generates your plan automatically after completion
- Simplifies management of risks and actions
- Incorporates latest MfE regulatory requirements
- Google maps integrated for farm mapping
- Integrates with other systems
- Unlimited users per farm

A digital tool for farmers and growers to build a freshwater farm plan
